

Nairobi and Mombasa do different jobs in Kenya's digital infrastructure.

Two centres of gravity. One system. The map makes the split visible.

Nairobi: the infrastructure cluster

19

TRACKED DATA CENTRES
OF 27 TRACKED NATIONALLY · 70%

13 **operational facilities** serving load today

6 **projects in the pipeline** - under construction, committed, early stage. Every project in Kenya's pipeline sits in the Nairobi metro.

144 **KIXP member networks** peer here (PeeringDB, Oct 2026) - ~3.0 Tbps of connected capacity; TESPOK's measured record peak: 1.3 Tbps (June 2024)

Concentration, interconnection and enterprise demand: **this is where the computing lives.**

Mombasa: the international gateway

7
LIVE SUBSEA CABLE SYSTEMS
CONNECTED TO THE COAST

4 / 4 **tracked data centres, all operational** - a mature, serving market, not a pipeline story

3 **more systems in the register** at earlier stages: Africa-1 landed with RFS pending, Daraja announced, LuLu planned

- TEAMS
- SEACOM
- EASSy
- LI0N2
- DARE1
- PEACE
- 2AFRICA

Landing stations here route Kenya to Europe, Asia, the Middle East and the wider region.

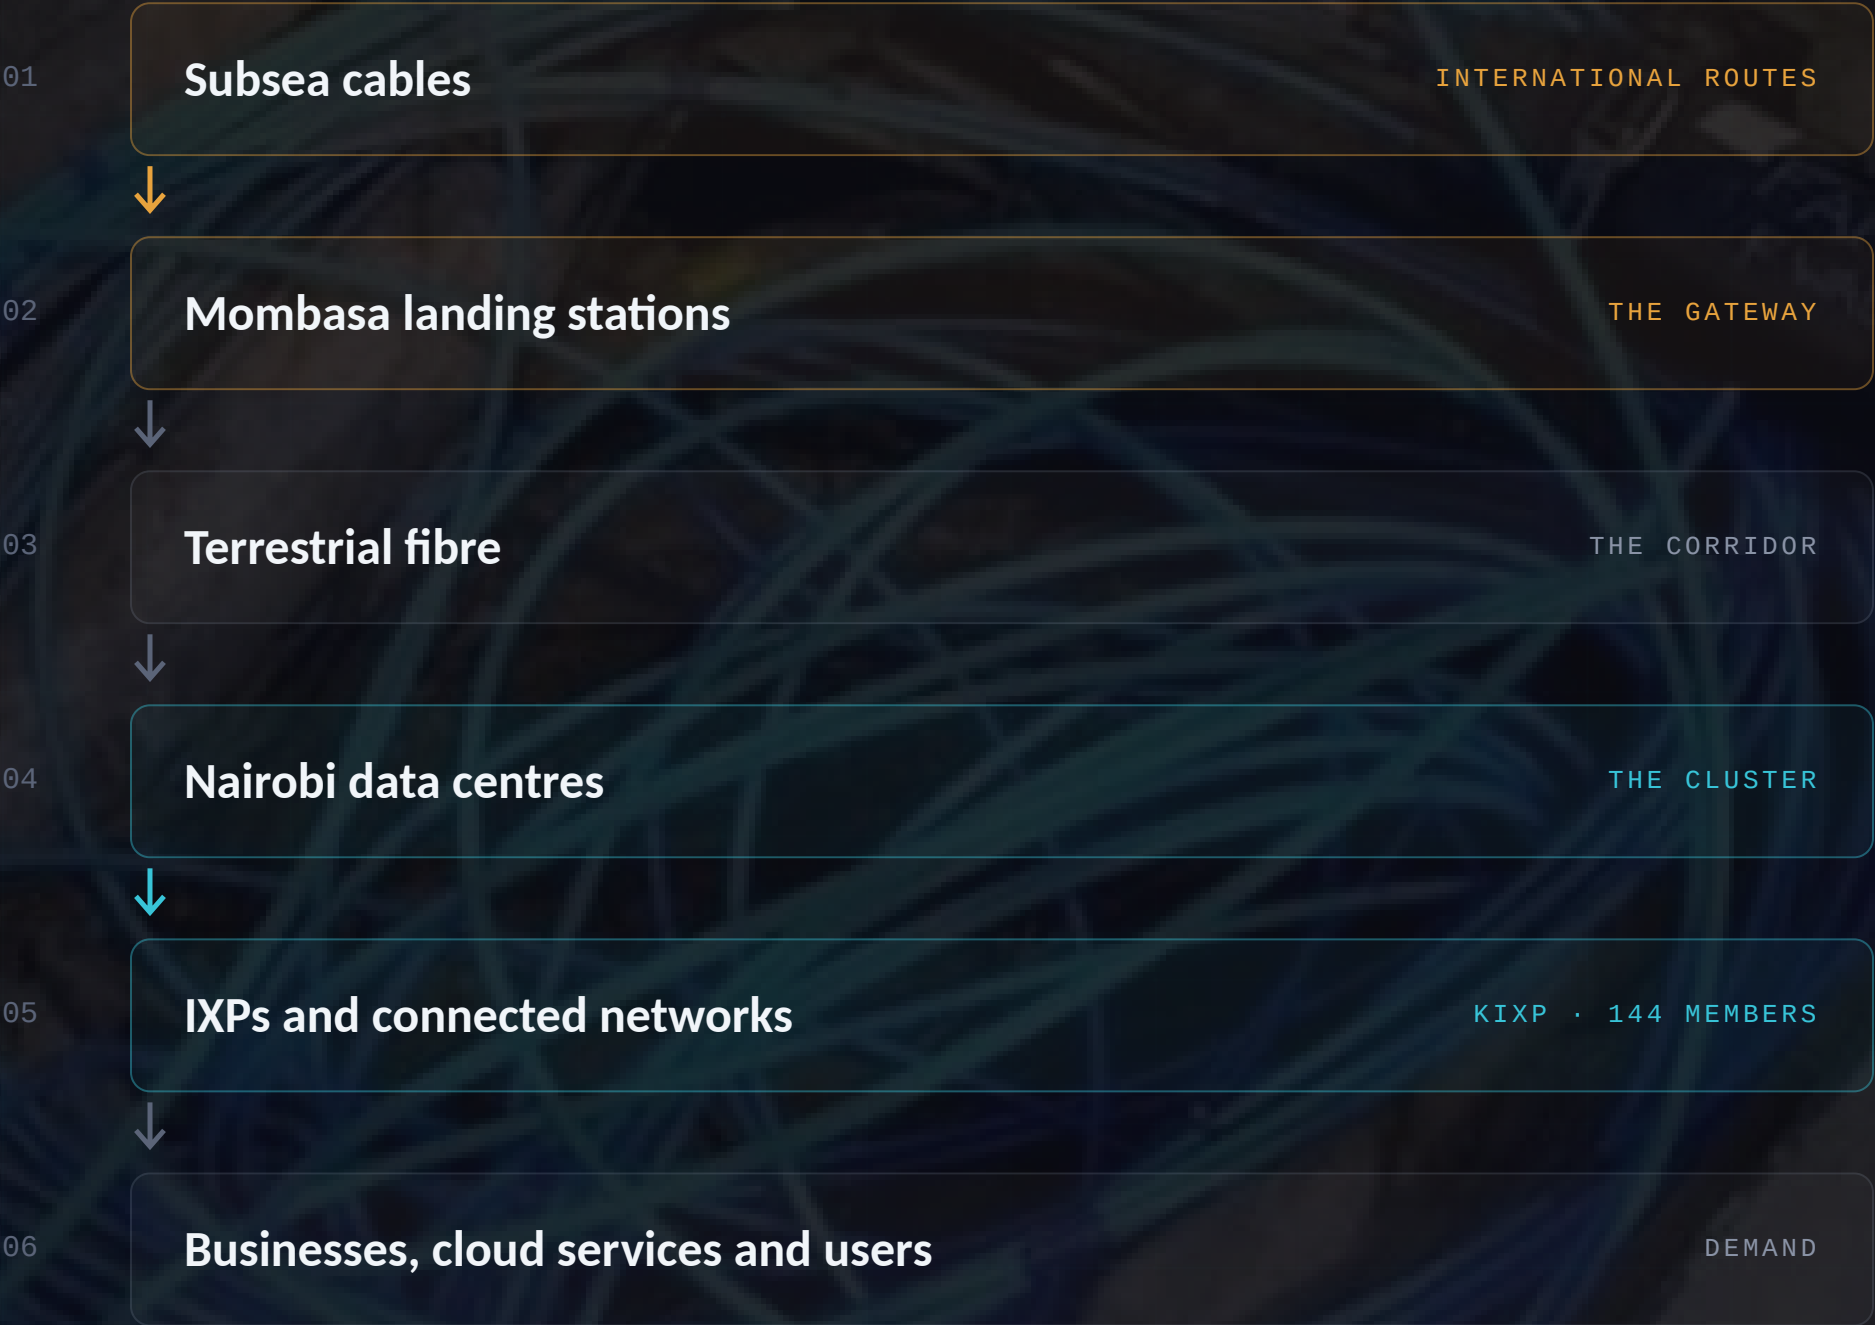

A gateway is not a cluster. A cluster is not a gateway.

Mombasa brings the routes. A cable landing does not automatically make a city a data-centre cluster.

Nairobi concentrates the compute. A data-centre cluster does not automatically provide international route diversity.

Kenya needs both: **Mombasa for international connectivity, Nairobi for concentration, interconnection and enterprise demand.** Neither role substitutes for the other.

From the coast to the customer

How effectively can Kenya connect the gateway to the cluster?

01 Coastal cable capacity

02 Terrestrial fibre

03 Nairobi facilities

04 IXPs

05 Regional markets

The opportunity is the connection between the two.

See both cities on the DC254 map

NAIROBI · THE CLUSTER

19 tracked DCs

13 operational, every pipeline project in the metro, KIXP peering

MOMBASA · THE GATEWAY

7 live cables

4 / 4 data centres operational, landing stations to three continents
